

Parental Engagement October 2021

This year we held 98% of our parental conversations with the majority being in person. With 114 responses to our feedback we can see the vast majority of our parents and carers feel that their child is happy and safe within our school community.

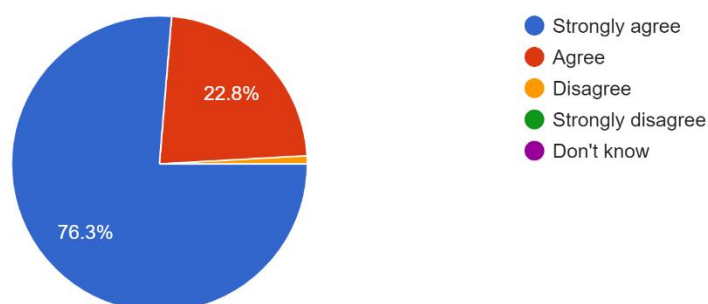

My child is happy in school

114 responses

My child feels safe at this school

114 responses

The parent conversations evenings felt very positive and it ensured that we had a greater understanding of pupils needs within the home environment. It was also pleasing to see so many attend our intervention and safe online workshops. We aim to provide more of these at our next parent conversation evening in May.

The feedback from the questionnaire has been positive and we are pleased to see that 100% of our families would recommend us as a provision for other families.

Feedback around a post 16 is really important for us to hear and this continues to be a passion for us as a school to secure a post 16.

Parental engagement figures will be updated following our second evening in May 22
